

**British Society for Research into
Learning Mathematics**

Proceedings of the Day Conference held at the
University of Birmingham
Saturday 14 October 1995

These proceedings consist of short papers which were written for the BSRLM conference on 14th October 1995. The aim of the proceedings is to communicate to the research community the collective research represented at BSRLM conferences, as quickly as possible. For this reason the papers have not been edited.

We hope that members will use the proceedings to give feedback to the authors and that through discussion and debate we will develop an energetic and critical research community. We particularly welcome presentations and papers from new researchers.

Contents	Page No.
Presentations	
Discussion Forum: <i>What is research in mathematics education?</i> Panel: Richard Noss, Institute of Education, London John Mason, Open University, Barbara Jaworski, University of Oxford Critical responder: Steve Lerman, South Bank University Chair: Laurinda Brown, University of Bristol	1
Research Reports	
<i>Analysing proceptual thinking through test items</i> Mark Hunter, John Smeaton Community High School, Leeds	7
<i>A new intuitive model of force and motion</i> Peter Mildenhall, School of Education, University of Manchester	13
<i>Learning to write mathematically</i> Candia Morgan, Institute of Education, University of London	19
<i>Children's conceptions of number at ages 10-11</i> Declan O'Reilly, University of Sheffield	25
<i>Gender effects in a small group mathematical problem solving environment of mature undergraduate students</i> Victor Parsons, University of Greenwich	31
Working Groups	
<i>Interviewing - A Support Group</i> Laurinda Brown, University of Bristol	36
<i>AMET/BSRLM Geometry Working Group</i> Keith Jones, University of Southampton	41
<i>Geometrical Reasoning: a report on the working group at the ICMI Study Conference on "Perspectives on the Teaching of Geometry"</i> Keith Jones, University of Southampton	43
<i>Teaching Mathematically able Children</i> Roy Kennard, University of Sunderland	48
